

Founder bios

Sanny Liao

Sanny Liao is co-founder and Chief Product Officer of Fable Security. She was previously the Head of Data Science at Abnormal Security, building its core detection platform, and the first Data Science hire at TellApart, shaping its bidding algorithms and scaling it to \$100M+ ARR. She holds a PhD from UC Berkeley.

Nicole Jiang

Nicole Jiang is the co-founder and CEO of Fable Security, the human risk platform that shapes employee behavior in real time. She was previously a founding team member and Head of Product at Abnormal Security, where she scaled the company from pre-revenue to a \$5B valuation. Earlier in her career, Nicole held product and engineering roles at Mixpanel, Microsoft, Palantir Technologies, and Pixlee, building products across AI, SaaS, and security. She holds an engineering degree from the University of Waterloo.
