

Change how your people behave, and prove it to your board.

Fable brings simulation, personalized intervention, and human risk scoring onto one platform, so every test and every nudge feeds the same closed loop and shows your board that risk is actually going down.

IDENTIFYING YOUR HUMAN RISK

SOCIAL ENGINEERING PROTECTION

SIMULATION

Vishing and email simulation

AI agents test employees by voice and email the way attackers reach them, and every result feeds risk cohorts.

What's Included

- **Vishing agent** that places live AI voice calls to help desks and shared lines
- Email simulation agent tuned to role, risk, and current threats
- Results that flow straight into cohorts to close the loop

Why it matters

- Get ahead of emerging threat vectors
- Reduce exposure to AI-powered attacks
- See which employees are at risk, then lower that risk

2%

phishing click rate at Dayton Children's, vs. a 15% industry average

SECURITY AWARENESS TRAINING

Personalized intervention

Short, on-brand briefings reach each employee in Slack or Teams and go live within hours of a new threat.

What's Included

- **Briefing agent** for personalized videos, nudges, and chats
- Emerging-threat briefings released in hours, not weeks
- Slide-based courses for annual and compliance training
- Reporting, integrations, and ROI tracking

Why it matters

- Get ahead of emerging threats
- Total control over brand and creative
- Fast time to value
- Close the loop proactively, before an incident

2.4x

higher phishing reporting at Pennymac after a Fable briefing

HUMAN RISK MANAGEMENT

Human risk scoring

Explainable risk scores built from your security stack, with automated fixes for the riskiest behavior.

What's Included

- **Cohort builder** to isolate any risky behavior, including AI use
- Integrations across identity, email, endpoint, SASE, and DLP
- Dynamic scoring and continuous risk monitoring
- Just-in-time interventions that close the loop

Why it matters

- A holistic picture of your riskiest behavior, at scale
- More visibility from the tools you already own
- AI risk you can measure
- Automated response to your most critical risks

60%

less PII data exposure at Bill.com, a 43x ROI

"Fable is the first platform I've seen that doesn't just raise awareness—it actually changes behavior."
